📂 Projects

* Django_Model_Form with Database connection(backend only)

In this project I am aiming to create a sample website of software developing company. This application allows users to know the information about the repetitive company and provide an appointment quotes to the admin. It also helps the users to view the previous works of the company. Provide an easy user interface platform.

The project provide an integration of django backend framework and react frontend.

--Tools used--
HTML,CSS,Javascipt,React,Django,Git
